

Detailed API Catalog for AI Training

API Name	Method	Endpoint	Purpose	Required Inputs	Options
Login	POST	/api/auth/login	Authenticate users and generate JWT tokens for accessing protected APIs	username, password	None
Current User	GET	/api/auth/user	Retrieve currently authenticated user's information including tenant and customer details	JWT Token	None
Customer Devices	GET	/api/customer/{customerId}/devices	Retrieve devices belonging to a specific customer	customerId, pageSize, page	text, sort, sort_order
Current Customer Devices	GET	/api/customer/devices	Retrieve devices belonging to the authenticated customer	pageSize, page	text, sort, sort_order
Tenant Devices	GET	/api/tenant/devices	Retrieve all devices under the tenant	pageSize, page	text, sort, sort_order
Customers	GET	/api/customers	Retrieve all customers under the tenant	pageSize, page	text, sort, sort_order
Tenant Users	GET	/api/tenant/users	Retrieve all tenant users and their assignments	pageSize, page	text, sort, sort_order
Latest Telemetry	GET	/api/plugins/telemetry/DEVICE/{id}/values/timeseries	Retrieve the latest telemetry values of a device	deviceId, keys	use_pagination

API Endpoints				
API Name	Method	Endpoint	Purpose	Required Inputs
Historical Telemetry	GET	/api/plugins/telemetry/DEVICE/{id}/values/timeseries	Retrieve historical telemetry values for analytics	deviceId, startTimestamp, endTimestamp
Server Attributes	GET	/api/plugins/telemetry/DEVICE/{id}/values/attributes/SERVER_SCOPE	Retrieve server-side attributes configured by administrators	deviceId
Client Attributes	GET	/api/plugins/telemetry/DEVICE/{id}/values/attributes/CLIENT_SCOPE	Retrieve device-side attributes reported by devices	deviceId
Shared Attributes	GET	/api/plugins/telemetry/DEVICE/{id}/values/attributes/SHARED_SCOPE	Retrieve attributes shared between server and device	deviceId
Device Alarms	GET	/api/alarms/DEVICE/{id}	Retrieve alarms generated by a device	deviceId, pageStart, pageEnd
Audit Logs	GET	/api/audit/logs	Retrieve audit information including login events and entity changes	pageStart, pageEnd
Entity Query	POST	/api/entitiesQuery/find	Perform bulk entity queries across thousands of devices	Query JSON
Entity Data	POST	/api/queries/entityData	Retrieve dashboard-oriented entity data for widgets and tables	Query JSON
